

LotusAutomation, a Sligo company which provides automation, instrumentation and technical services internationally is currently developing practices regarding the company's corporate responsibilities both within the local community and broader international charities.

As part of this development the company has engaged with a small charity 'Cheryls Childrens Rescue Centre' which is involved in the supporting children who have lost one or both parents due to HIV/AIDS. The charity has built a children's home in Nairobi, Kenya and the project is providing accommodation, education, food, clothing, medical care and social development to 40 residential children. It also has another 116 children being taken care of through a foster care programme.

LotusAutomation's has provided a large amount of the sponsorship required to travel to Nairobi to Caroline Currid, who currently works with Lotus as a Performance Coach. Caroline is assisting Lotus employees to determine and achieve personal goals, as part of her own personal goals Caroline will travel to Nairobi for three weeks in June to work with this charity helping the children and assisting in the building of classrooms and a dormitory.

LotusAutomation wishes Caroline well in her forthcoming charity work and also takes this opportunity to thank our suppliers and other that have supported the charity through sponsorship.
